DETAILED ACTION

1. Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for transaction source and a transaction target to exchange a transaction that cannot be repudiated by verifying a source authentication assertion and a target authentication assertion. The closest prior art cited Andivahis et al. (US 7,146,009) teaches a secure electronic messaging system with the principal entities that include a sender, a recipient and a key server. The sender authenticates with the key server and the key server sends key retrieval information to the sender. The sender sends the encrypted message and the key retrieval information to the recipient. The recipient sends a request including authentication information, the sender's identifying information to the key server. The key server authenticates the recipient retrieves the archived key referenced by the key retrieval information and sends the key to the recipient. Andivahis does not teach an authentication assertion, Favazza et al. (US 2004/0139319) teaches a policy server that issues an authentication assertion after a determination is made whether the customer is authenticated and authorized and a customer inserts the assertion to a request to a second web service.

However, the prior art cited either taken singularly or in combination fails to anticipate or suggest the limitation of applicant's independent claim, specifically a transaction source and a transaction target to exchange a transaction that cannot be repudiated, verifying a source authentication assertion; and storing transaction identifier and information from said source authentication assertion, thereby establishing

information making the transaction source unable to plausibly repudiate once it encrypts and sends a transaction; and verifying a target authentication assertion; storing information from said target authentication assertion with the transaction identifier; and thereby establishing information making the transaction source unable to plausibly repudiate being a recipient of the transaction. The claims are therefore considered to be in condition for allowance as being novel and nonobviousness over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
